### EXPERIENCE ENTERPRISE BOOKLETS

Experience Enterprise is a great tool for students - increasing their enterprise skills without any demands on teachers who are already drowning in a sea of initiatives and projects. It's written to meet your needs by Neil Denby, Business Chief Examiner and enterprise specialist. It's also a great way to gather evidence for Ofsted inspections which now include Enterprise!

Experience Enterprise is a booklet for young people to complete during work experience. It builds their ability to solve problems and structures their placement. Over 50,000 copies have already been sold. It's great value at only £1 per 32 page booklet with a full colour design that really engages students. It helps everybody:

*"The booklet meant that before we went we had more idea of what to expect on work experience. We looked at aspects that we wouldn't necessarily have thought e.g. a problem that the company had and how they would fix it". L.D. Student*

*"This booklet fills a gap by helping students to understand what enterprise and being enterprising is about. I can thoroughly recommend it as part of a school's enterprise requirement in schools". D.C. Head of Year 10*

*"The booklet was well laid out and attractive, the tasks were excellent and really engaged the kids. It provides a structure for work experience. Students had to look at real issues within the business and apply real enterprise to come up with solutions".*
